

When Listening Comes Alive

Foreword by Norman Doidge, M.D., author of *The Brain That Changes Itself* and *The Brain's Way of Healing*. In *When Listening Comes Alive*, Paul Madaule re-awakens a skill that we all have - a skill that can improve communication, creativity and learning ability, allowing a fuller and more energetic life. Paul demystifies Listening Training as both clinician and client. Diagnosed as dyslexic at an early age, he experienced a remarkable recovery with the help of Dr. Alfred Tomatis. Since then, at The Listening Centre in Toronto, Paul has helped thousands of people for over 35 years. He has summarized the listening training work and has included a unique selection of Earobics, daily exercises that will allow you to develop and improve your listening skills on your own. This is a book about listening at all stages of life - for parents-to-be, hard working professionals, teachers, early childhood educators and parents seeking help for children with learning disabilities, ADHD or in the autistic spectrum. *When Listening Comes Alive* is a guide to a better and more fulfilling way of living.
